PORTFOLIO PROJECT / AI OPERATIONS

AdScout

Advertiser research and pitch review

Research brands, check their fit, and prepare pitches for a person to review.

THE WORKING PROTOTYPE

Peter Rentopoulos

Synthetic demo · Scripted model responses

THE BUSINESS WORKFLOW

Deciding which brands deserve a closer look

Give the researcher a clear decision and the evidence behind it.

01

Find potential advertisers

Start with a segment and public company information.

02

Explain the fit

Rank each brand and keep the reasons behind its score.

03

Prepare the next step

Review a cited pitch before it reaches the CRM sandbox.

Measures for the next study

Qualification quality · Review time · Cost per qualified lead

HOW THE AGENTS WORK

Research, checking and human review

A bounded workflow with a separate check before each handoff.

01

Enrich & score

Company facts and rubric ratings

→

02

Research team

A lead and three read-only specialists

→

03

Check claims

Source URLs and matching quotes

→

04

Draft & critique

Writer, rule checker and critic

→

05

Human review

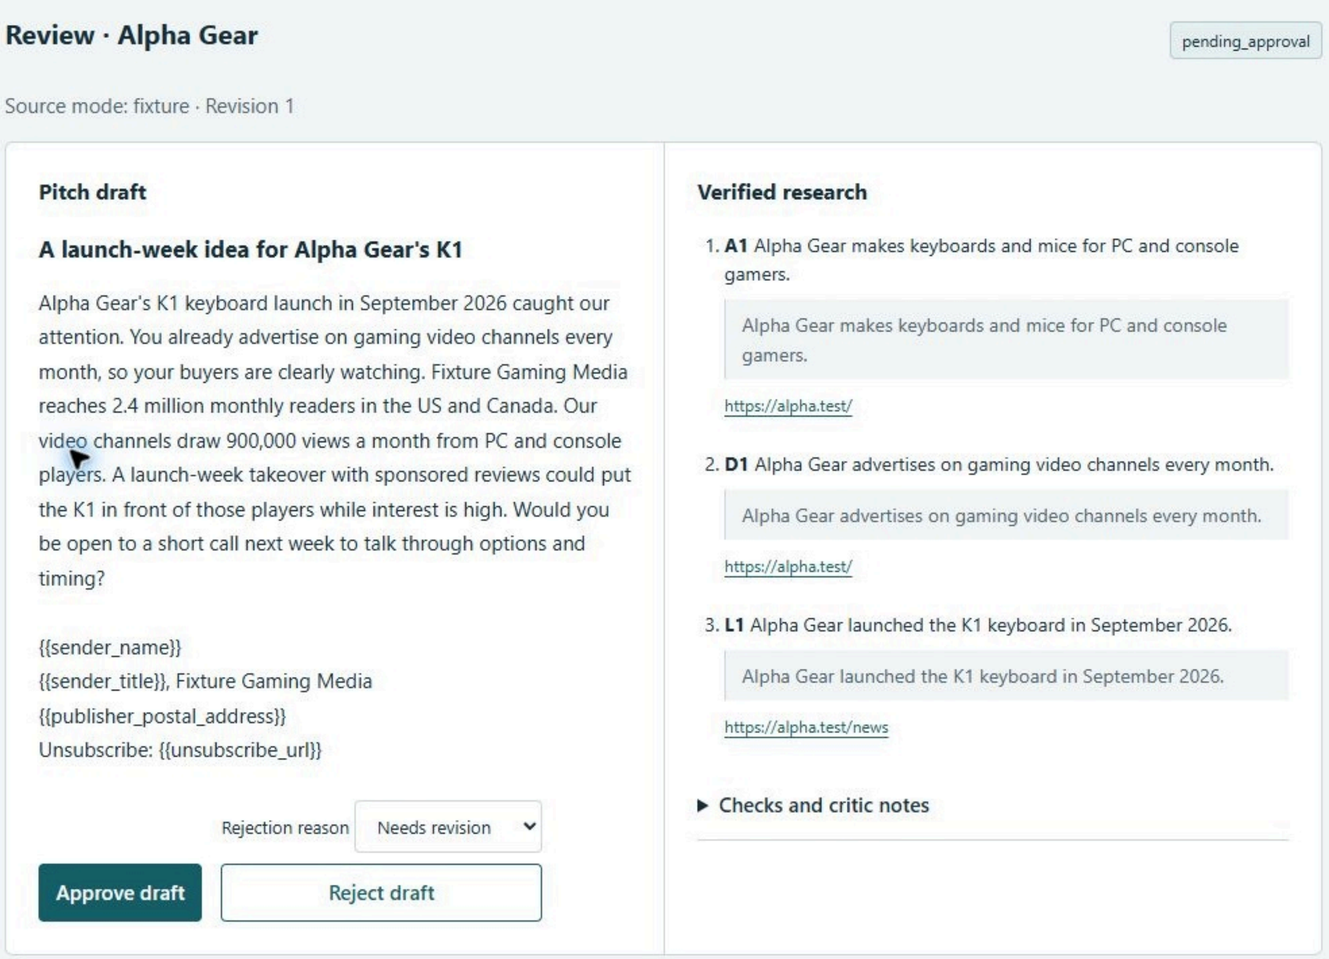

Approve or reject the reviewed draft

Tools are read-only. Worker and spend limits are enforced in code.

Approved records continue to the local CRM and sandbox inbox.

THE REVIEW SCREEN

The draft and its evidence, side by side

Verified source quotes

Open the URL behind each claim.

Human approval

The decision is tied to the reviewed subject and body.

Visible exceptions

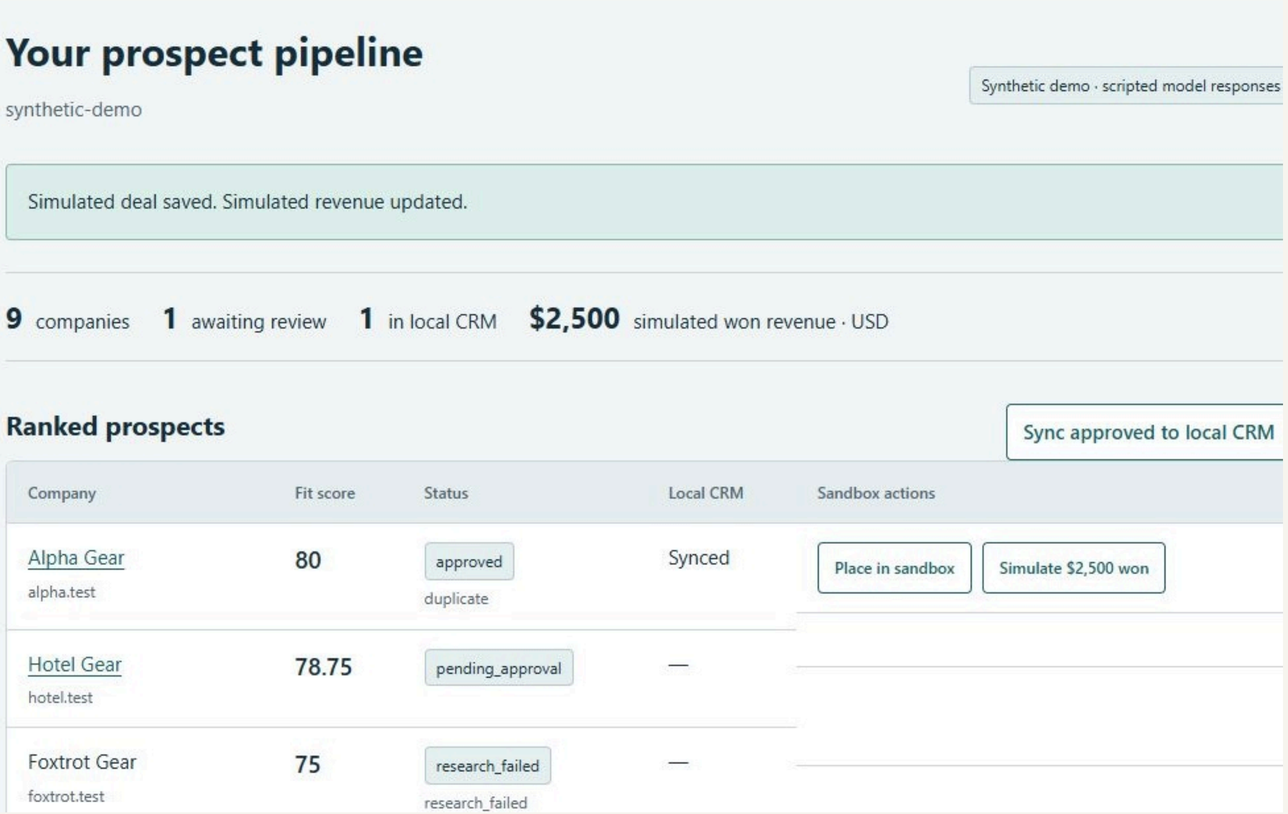

Partial research and critic concerns stay visible.

Actual app capture · Synthetic company and publisher facts

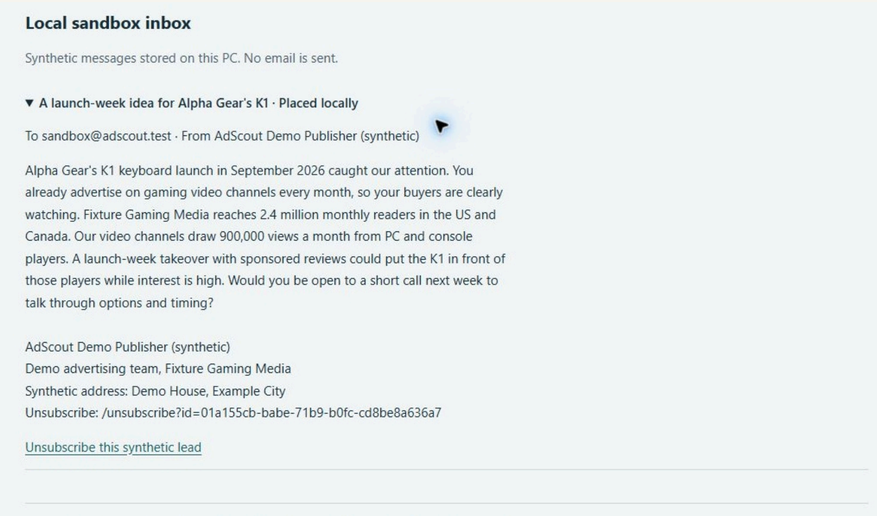

Approved prospects connect to a revenue view

Approval → local CRM → sandbox inbox → simulated deal

Local CRM and simulated revenue

The approved message

No email is sent.
Unsubscribe blocks later sandbox delivery.

The displayed revenue is a simulated scenario, not a measured sales result.

VERIFICATION AND NEXT STEPS

What is verified, and what comes next

518
software tests

90
offline evaluation tests

94.81%
code coverage

Next: measure live qualification quality, citation accuracy and cost per qualified lead.

Then connect an external CRM sandbox and package the app.

Demo model responses are scripted. Live quality and sales impact have not been measured.
